

Astral Sleep "Cosmic Key"

I see the great warlord of spaces chasing me through
the dimensions.

The dragon, the conqueror, the destroyer, any form it
takes.

It chases me and never let's me go.

I can escape now and forever.

But I will never know what is after me and why.

In this world I can't tell what I should be looking at.

The world of unbalance, yet so great harmony, the
world of dreams and the depths of mind.

The things that I will see here are true to me,
I have to find the way to read them right.

The corners of cosmic expressions are the keys to find
your true self.
