Hey stop and listen
Cause this time I finally got it right
I have always tried to make things work
So this time lets get down on it..
Was it ever a mistake?
Or was this just a chance to remake fate?
You and all your friends just keep quiet
Cause you've got another song about you!

You crashed and burned
Break this down
Cause we finally got this right
And I should have never lost you anyways...
You crashed and burned
Break this down
Cause we finally got this right
And I should have never lost you anyways...

Don't stop just relax...
Cause this time I finally got it right
I was hoping we would stop this one day...
But I got better plans without you
We can get down. Tonight.
Make this last
I'll make it everything you wanted
Don't hold back
I've got a new plan, new game lets set this straight
I never wanted more than what you gave...

This time I finally got you
This we we finally got it right
