

At Dawn We Die "With A Dying Breath"

Visit "[With A Dying Breath](#)" on MotoLyrics.com

Pressure is closing in on me, could the reason be that
we were falling down off the backs of angels so far
above this dying world

So now we close our eyes and pretend it's ok while the
world falls down around us
Everytime we fall down, Everytime we fall

Now the oceans are red with all the blood, rising to
drown us all we stand and watch, the dead have risen
and no one can see the fall of the world
Now the oceans are red with all the fucking blood

Can you see the moon burning so red tonight, screams
of a dying world so cold inside, and now we look ahead
to find a reason why... here we buried paradise

Now we stand in the ashes of Eden praying to find
something more than this... Now as the sky falls down
bleeding all around us and still you close your eyes...
Now at the burial of our dying world you close your
eyes

What have we done to the paradise that we were given

What have we done... What have we done...
