Let's fall in love again
Tap the windows
And rescue our friends
How long til this makes sense
Oh, oh

Let's fall in love again
Guard the windows
And rescue our friends
How long til this makes sense
Oh, oh

It's calling out loud and it's taking over
Bleeding right out of the summer sky
It's calling out and it's taking over
We give it our all, so we don't know why
We can't slow it down
It's way too fast
Slow it down
It's way to fast

We're going on a search in some
Second hand stores
Gotta get back what we all threw away
We're going on a search in the middle of nowhere
We don't know what we're doing but we gotta just give
it a go
We gotta just give it a go

Let's fall in love again
Tap the windows
And rescue our friends
How long til this makes sense
Oh, oh

Let's fall in love again
Guard the windows
And rescue our friends
How long til this makes sense

Oh, oh

Now let's sing this song again
Cause it's been messed up for years
And let's make it ours again

Desperate like rainforest trees
Straining towards broken light
All fighting for their lives

Let's something something
Cause that's where this song began
Born out of true romance

It's calling out loud and it's taking over
Bleeding right out of the summer sky
It's calling out and it's taking over
We give it our all, so we don't know why
We can't slow it down
It's way too fast
Slow it down
It's way too fast

We're going on a search in some
Second hand stores
Gotta get back what we all threw away
We're going on a search in the middle of nowhere
We don't know what we're doing but we gotta just give
it a go
We gotta just give it a go

Slow it down
It's way too fast
Slow it down
It's way too fast
[x2]
