There's a shining in the sky  
It's a really good friend of mine  
A light from high above  
A mysterious, magic sign

Well, it covers everything with grey  
When the day is away  
And I'm praying when it's there  
That your light be everywhere

Shine on me - shine on me brother  
You have to shine on through the night

Shine on me - shine on me brother  
I welcome brother moon tonight  
Shine on me - shine on me brother

Welcome brother - welcome brother moonlight  
Welcome brother - welcome brother moonlight  
Welcome brother - welcome brother moonlight  
Welcome brother - welcome brother moonlight
