High above I've got to be your true lover
And I wanna discover
All about your love

Gonna sing in my heart
And together forever
I will never say never
To my love and pain

Never get down feel the winter
The sunlight is cold
And mountains are covered in snow

I wish it could rain now, forever
The clouds turn grey
The wind blows I don't wanna go

Let your sun light up my life
Like the snow lights up the night

Let your heart open your mind
Don't wanna hear you say goodbye

Now I close my eyes to hold my dreams inside
I bare my heart for you and now you see me cry

For you i will die
Let all angels fly
Don't leave me alone

I will not pray
I want you to stay
Built my wishing well
I'm under your spell

See us glide across the world and drift into another
day
Hear me crying in the night I wanna save my love for
you

Now close your eyes

I bare my heart for you

And I feel cold like in winter
The sun rises high
The angels will open their sky

And i hear the words out of twilight
Beyond frozen fields
The truth and all secrets revealed

So let us glide snowflakes alike
On the ice that breaks tonight
And i know the time goes by
Oh let us fly
And let me close my eyes to hold my dreams inside
I bare my heart for you and now you see me cry

For you i will die
Let all angels fly
Don't leave me alone

I will not pray
I want you to stay
Built my wishing well
I'm under your spell

Don't go away
I want you today
In heaven or hell
I'm under your spell

High above I gotta be your true lover
And I wanna discover
All about your love
Gonna sing my heart together forever
I will never say never...to my pain
High above I've gotte be your true lover
And I wanna discover
All about your love
