Will you  
Will you try to reach the distant light  
Running  
Running when the days fade into night

And I will find the hidden gate  
I'm longing for so long  
I will never know  
If i will enter or may die

Down in the underwold life and underworld dream  
A mirror shadow of what i be  
Underworld love and Underworld gleam  
Don't let me go astray on my way to you

Riding  
Riding on the wings of death  
Hear them calling bear me name and my seal my fate

I see my life a battlefield  
The future and the past  
The secret candle you have lit  
Will burn my soul at last

Down in the underwold  
Life and underwordol dream  
A mirror shadow of what i be  
Underworld love and Underworld gleam  
Don't let me go astray on my way to you

Shadows gimme shelter  
Let me hide myself tonight

Down in the underwold life and underworld dream  
A mirror shadow of what i be underworld love and  
Underworld gleam  
Don't let me go astray on my way
