And when you say my name girl,  
You know I can't refrain from  
Holding back a smile  
And when we're holding hands it's  
Like we're living like we always planned  
And you are by my side

And if you say it's right then.  
Maybe we could spend the night and

The light, from the city seems to shine so bright  
When they shine off your eyes  
The way the wind blows through your hair  
It always leaves me standing there  
So speechless,  
And so unprepared, oh yeah

Do you remember when we were young,  
And we had a plan to just have fun,  
But then we fell in love  
We're taking on the world together,  
You know I'll stay for worse or better

The light, from the city seems to shine so bright  
When they shine off your eyes  
The way the wind blows through your hair  
It always leaves me standing there  
So speechless,  
And so unprepared

I know that we both made mistakes,  
But babygirl, it takes more than one kiss to make you  
forget  
About that boy you fell, in love with.

The light, from the city seems to burn so bright  
When they burn out your eyes  
Then you went and you threw it all away  
I tried to see the one I'm better with  
And now, I'm not broken
