The water breaks
The golden sunrays
Silver dances on the waves
But a memory

I often dream about the old days
Playing hide-and-seek within the caves
But a memory

I still feel the rising tide embrace me
Carrying me to a place unknown
But a memory

Oh I remember all the love they gave me
In this fluid world we call our home
But a memory

Beneath the waves we were invincible
In a world without frontiers
Beneath the waves the waves we were inseparable
In a world without walls

[Instrumental]

Faces of cerulean oceans
Mirroring stars and sable skies
But a memory

How I miss the sense of sweet emotions
Of a world so pure devoid of cries
But a memory

Beneath the waves we were unbeatable
In the silence of the sea
In a world without frontiers
(World without walls)
Beneath the waves the waves we were untouchable
In the kingdom of the free
In a world without walls

Beneath the waves we were invincible
In the silence of the sea

In a world without frontiers
(World without walls)
Beneath the waves the waves we were inseparable
In the kingdom of the free
In a world without walls
Face the facts, there is no way back
Arise, It's time to act
Face the facts
Our future is black
Arise, we're on the wrong track

Face the facts, there is no way back
Arise, It's time to act
Face the facts
Our future is black
Arise, we're on the wrong track

Face the facts, there is no way back
Arise, It's time to act
Face the facts
Our future is black
Arise, we're on the wrong track

The water breaks
The golden sun raise
Silver dances on the waves
But a memory

I often dream about the old days
Playing hide-and-seek within the caves
But a memory

Beneath the waves we were unbeatable
In the silence of the sea
In a world without frontiers
World without walls
Beneath the waves we were untouchable
In the kingdom of the free
In a world without walls
World without walls!

Beneath the waves we were invincible
In the silence of the sea
In a world without frontiers
Oooohhhh!
Beneath the waves we were inseparable
In the kingdom of the free
In a world without walls
