There must be a way to enrich our lives.  
A way to awaken a nation that dies.  
There must be a way to revive our past.  
A way to break free from a world that won't last.

Take me back to when we lived another life  
Back to when we had no plan  
Take me back to when we struggled to survive  
Back to when it all began

There must be a way to reverse history  
A way to resume life, return to the sea  
There must be a way to went back (to) what we lost.  
A way to escape this, whatever the cost

Take me back to when we lived another life  
Back to when we had no plan  
Take me back to when we struggled to survive  
Back to when it all began

Explore the vastness of space  
Discover a wonderful grace  
Enter a brand new face  
See the world with a a newborn race (x2)

We have no choice  
Life is passing us by  
We should rejoice  
I say we should try

Every million cycles  
shooting stars rip our sky.  
We could divert them  
on the day they passed us by.

And on that shining day  
there is a way for our DNA to reach the outerspace  
And on that charming day

there is a way for our DNA to reach a world to stay

Hmmm... Do we have the right to create life?  
And do we have the right to take it? Yeah  
Can we decide who lives and dies?  
Do you think they would even make it

We have no choice  
Life is passing us by

We all plant our seeds  
And guide them to their goal  
We cannot fail  
We have absolute control

And on that shining day  
there is a way for our DNA to reach the outerspace  
And on that charming day  
there is a way for our DNA to reach a world to stay

Hmmm... Do we have the right to play gods?  
I strongly feel I have to make a stance  
Do you think we should take the odds? Yeah.  
Would they even stand chance?  
I don't think they ever will.  
Ever will...  
No...
