"The Dawn Of Man"

Visit "[The Dawn Of Man](#)" on MotoLyrics.com

More than a million years ago
It came to earth out of the sky
From whence it came is yet unknown
And still we don't know why

Way beyond infinity
Where time is lost
And life has ceased to be
And life has ceased to be

There's a cosmic entity
A bringer of life
For all eternity

Is this how it all began?
The dawn of man

More than a million miles from earth
Somewhere in outer space
Behold a planetary birth
Making way for a brand new race

Way beyond infinity
Where time is lost
And life has ceased to be
And life has ceased to be

There's a cosmic entity
A bringer of life
For all eternity

Is this how it all began?
The dawn of man

Is this how it all began?
