You waltz into the room
Just like you never left
And for a moment or two
I could almost forget
You take me in your arms
And I fall again

Thats no way to break
a heart
You call my name
I drop my guard
Why can't you play
your chosen part
And stay away
so I can make another start
That's no way
to break a heart

Weren't you supposed
to need
Something I could not give
But now you're lying
so close to me
And you're taking
everything
I can't hold on forever
For nothing more then this

Chorus

No don't touch me,
dont you kiss me
Dont you realize That's no way to say goodbye
