"Lungs Full Of Air"

Visit "[Lungs Full Of Air](#)" on MotoLyrics.com

Lungs full of air do I need to breath more
Listen while I tell you about a little sequel (of how)
So much has taken place in such small space
Having so many days and now causing ways
Polluting in every way, (but now) money has the first
say (stand back)
Don't think about all the life's traps (every change
brings by some
chance)
So stand and watch in advance how the world is
attached
And it's now feeling small coz the whole globe's
connected
Like it's growing showing giving taking
Listen while I state this everyone gets a status
And if some get neglected then we all get affected
Too many things get reflected situation turns hectic
Problematic and extensive parallel chain reaction
See the message is blessed with the factors that
repress thee

Can you hear me?
Can you believe?
The air I breathe
We all need it
Open your eyes
Look properly
Watch as the flames
Keep growing quick

Lungs full of air do I need to breath more?
Heat in the air can you really feel the core?
Some live close and some live remote
But when it comes down to it its the same scenario
Eyes open wide do I need to see more?
Heat of the flames can you really see the glow?
Some run away and some choose to stay close
Day to the night its the same across the globe

Eyes open wide do I need to see more
As the size of the globe becomes kind of equal
To the circumference of the planet earths core

Like a walk to a spot for a visual post
Walking to the back seat as if the world is a coach
Like the faith in the heart isn't as strong as before
Scripted we know, with time will be shown
With counter-clockwise we'll be in the third zone
Where you can't even talk and you can't even show
Whether you agree with the form of art or deep down
you don't
Private life is the thing of the past and it's long being
sold
Kept the deal in the (Shhh) so the masses ain't told
Like the souls are getting torn as the new babies are
born
But the interconnection of souls is written in bold
Vitamin world where we represent like we rapport
Praying for the metamorphosis of hope and love galore

Can you hear me?
Can you believe?
The air I breath
We all need it
Open your eyes
Look properly
Watch as the flames
Keep growing quick

Lungs full of air do I need to breath more?
Heat in the air can you really feel the core?
Some live close and some live remote
But when it comes down to it its the same scenario
Eyes open wide do I need to see more?
Heat of the flames can you really see the glow?
Some run away and some choose to stay close
Day to the night its the same across the globe
