Chorus:

This the kind of music that make yo trunk rattle (4x's)
This the kind of music that make yo trunk rattle
Groupies posted on the side which nigga want to battle
This the kind of music that make yo trunk rattle rattle
rattle
Make yo trunk rattle

Verse1:

I keep laughing at these niggaz cause they playing with
the bars
Let a higher being of intelligence deport from mars
Music addicting like a yoyo put me down to the top I go
Stay dropping new music like a fresh pair of polos
My cds spinning in thug cd players just like a dradle
Yall rap them baby bars put me to sleep go grab a
cradle
I know yall wish was this fire everybody aint able
Known on every social network, blog, tweet & cable
I make these niggas want to go put systems in they
whips
Make em take rap classes 101 for the tips
Make the deaf wish they could hear instead of reading
lips
And any hater want to run it gone and grab the clips
I like the chevy cars gutti out with the trunks loaded
They put avias in they speakers guess what? they
exploded
These niggaz dropping shitty tracks yo that's just so
caroted
But when I drop a track night clubs hand me the money
folded

Chorus:

Verse2:

I got these niggaz cars lined up in empty parking lots
Um like a shooting star so they know who calling the
shots
It aint a block party but gangsta cars lined up like whoa
Like a scene from E.T., the arrival of
Bars go so hard like masculinity from schwarzenegger
This why I got so many impersonators so many haters
They like a k.f.c meal with the drink forgot the potatoes
Um like a five star meal shrimp, steak side of tomatoes
Too cunning for the sneaky too bad with nice figures
I aint a trick daddy or trina but you don't know nann
nigga
Yall can call me what you want to but never mention
quitter
Music making yall so dizzy like cheap bottles of liquor
They took a number stepped up platform crowds
screaming yay
I asked them who was next in line who next I'm gonna
slay
I see these niggaz like vampires from a movie like
blade
They ended up like debo from friday got layed

Chorus:
