Intro: welcome to mars

Uh huh

The nemesis

Verse1:

I welcome you earthlings to a world of bars

You just left the ordinary you just entered mars

This planets revolutionary more high tech than ipods

More high tech than black eyed peas boom boom pow

you nim rods

My flow colder than ice rocks on the moon so they hard

and

Um the thing, the operation and the brain, yall just

martians

Now depart from me follow orders got tonS

My music fascinate humans like area 51

Chorus:

So when I tell em that I'm from world of craters and
marsh

I don't mean to be rude or sounding to harsh

Here I write my own music then drop my own bars

And the truth the news don't know is that they coming
from mars

Then I land back on earth and send chills down they
spine

Like an ambient creature scaring them from behind

This land is extraterrestrial from here born my kind

Yall had yall turns to shine now it is my time

Verse2:

I know I get straight to the point but it's time to bend it

Reinforce a new order, crazy, outer limits

Mars is a planet where music is created and wild

My old fans left me but they know um bout business x-
files

My mind made up like a galaxy cause I am a star

Talent all in my fingers like e.t. sitting in a cart

Earth needed a rapper so I'm the one mars chose

Sent me down from this planet in creepy u.f.o's

Chorus:

So when I tell em that I'm from world of craters and
marsh
I don't mean to be rude or sounding to harsh
Here I write my own music then drop my own bars
And the truth the news don't know is that they coming
from mars
Then I land back on earth and send chills down they
spine
Like an ambient creature scaring them from behind
This land is extraterrestrial from here born my kind
Yall had yall turns to shine now it is my time

Verse3:

Makind you don't understand me cause I'm not your
kind
I'm the reason why you're crops are redesigned into
signs
Power brighter than the sun intellect goes beyond
Everytime I make a song lyrics are dope and it's fun
I'm all up on you're pc's like commercials from the
radio
Everyone tuning in like a satellite for stereos
And haters can't block me out cause the talent will just
shine
My music travel so fast like lyrics from busta rhymes

Chorus:

So when I tell em that I'm from world of craters and
marsh
I don't mean to be rude or sounding to harsh
Here I write my own music then drop my own bars
And the truth the news don't know is that they coming
from mars
Then I land back on earth and send chills down they
spine
Like an ambient creature scaring them from behind
This land is extraterrestrial from here born my kind
Yall had yall turns to shine now it is my time

Thank you for visiting mars! next stop planet earth
spaceship blast
