It is time to reflect upon your "ego-self". Nowhere to hide when the walls echo the you that we All see. Ah, the smiles dissolve! The pulse begins to race; the face a flush of fear so plainly Painted. The Mirror World - the Mirror Maze: Confrontation...

### [A. INSIDE THE MIRROR MAZE]

[hippie]

Mirror mirror I can see a lonely child, he kinda looks like me

Staring out into infinity

His father lies, his mother cries, his spirit flies up in the skies

Wandering off to another galaxy

[futureman]

Secret fears we all try to hide

Lie dormant deep inside us

Defy the ghosts of long forgotten days

Here inside the mirror maze

[hippie]

Mirror mirror I can see an angry boy, oh well I guess he's me

Rising up to the society

He's aware that no one cares and life's unfair so he growa his hair

And takes a trip into eternity

[futureman]

Secret fears we all try to hide

Lie dormant deep inside us

Defy the ghosts of long forgotten days

Here inside the mirror maze

### [B. THROUGH THE MIRROR]

[roman] I see a man, who's unable to withstand his fears inside

[knight] inside we're all but frightened men  
But we have to fight until the end is here  
[roman] hear what I say: I am doomed,  
I have to pay, I can't go on  
[knight] go on and persevere  
For we have to make it out of here alive  
[roman] a life is but a dream,  
For in the mirror I have seen what lies within  
[knight] within this armour cold and bright  
Lies a noble heart with the will to fight the pain  
[roman] the pain cannot be healed,  
I'm surrounded by this shield I cannot break  
[knight] break through the mirror now  
Follow me, I will show you how

[roman] we've reached the other side,  
I have overcome my pride and made it through  
[knight] we threw aside our darkest fears  
And stepped across these new frontiers of time  
[roman] time can only tell what awaits us in this hell full  
of deceit  
[knight] deceit, guile and treachery  
Will they ever set us free again?

[roman] riding on the wings of time
