[Brian:]

Here I am again
Waiting on the moment you decide
To leave me stranded on the edge of nowhere
I've been so close to you so many times
I feel like I could drown
I wish that I could fly away from here

[All:]

But I'm still coming down

[A:]

From the last time

[All:]

That you came around

[A:]

In the starlight

[All:]

Now I'm pulling to your gravity
Spinning helplessly
I'm falling through the night
Like a lonely satellite

[A:]

Like a lonely satellite

[Nick:]

With walks on Jupiter
Fool around the moon a time or two
Left a mark on every star we could find
But now I'm burning like a meteor
That never hits the ground
Wish that I could fly away from you

[All:]

But I'm still coming down

[A:]

From the last time

[All:]

That you came around

[A:]
In the starlight

[All:]
Now I'm pulling to your gravity
Spinning helplessly
I'm falling through the night
Like a lonely satellite

[Nick:]
Love is poisoning the atmosphere
Is keeping everything unclear to me

[Howie:]
Something in your eyes
Never satisfies
I'm feeling so alone, tonight

[All:]
But I'm still coming down (still coming down)
From the last time (the last time)
That you came around (you came around)
In the starlight (the starlight)
Now I'm pulling to your gravity (ooooh)
Spinning helplessly
I'm falling through the night (falling through the night)
Yes I'm falling through the night (falling through the night)
Like a lonely satellite

[Nick:]
Like a lonely satellite
