its a brand new day, I can feel it in the air
I see it so clear, the next movement is here
its been a few years but I'ma make it reappear
see this is hip hop, can I get a Aw Yeah
I used to love her, most of yall never knew her
almost everyday I would write a letter to her
I let her know what we've all been doing in her absence
and how we only tend to speak about her in the past
tense
cause today, every song is uniform
we wonder how we all gon make it through the storm
then from the art form, something brand new is born
and you know word is bond when I get up on the horn
we talk about how the game was once golden
forget its ever moving, keeps unfolding
so they ask me whats next, but I dun told em
this is the next movement, we are the ones chosen

CHORUS:

watch what ya doin and set it in motion
set it in motion its the next movement
watch what ya doin and set it in motion
set it in motion its the next movement
watch what ya doin and set it in motion
set it in motion its the next movement
watch what ya doin and set it in motion
set it in motion its the next movement
the next movement, this the transition
for rap music, what it is the fans missing
those who wont listen, so my sole mission
to get, everybody to throw this in the deck
yea ... I'm starting to see a lotta signs
but they got nothing to do with them dollar signs
no, that is not why i signed on the dotted line
see i am in my prime but aint gotta lotta time
I can see what this game could be by now
and the reason that it aint that, i see why now
so I ask why now, with all the potential
give us an instrumental, pad and a pencil
this how it was meant to, be for the people
how we do, I relate with those that I speak to
bigger than a monster hit, we past social

this is rap with a spiritual consciousness

CHORUS:

watch what ya doin and set it in motion
set it in motion its the next movement
watch what ya doin and set it in motion
set it in motion its the next movement
watch what ya doin and set it in motion
set it in motion its the next movement
watch what ya doin and set it in motion
set it in motion its the next movement
