

Bald Vulture "Unity"

Visit "[Unity](#)" on MotoLyrics.com

Theres a war going down between my brothers tonight
I dont want no war going down tonight
civilization ha I call it as I see it
I call it bullshit you know I still cannot believe it
our evolution now has gone the way of hate
a world evolved resolved in this stupid fate

stop this war

All so different yeah I say were all the same
All caught you know in the division game

self destruction fast impending like a bullet
no one can stop it once its fired no one can control it

stop this war

A final word, wait it's not a call to action
We aint no sect we aint no fucking faction
Unity unity youve heard it all before
This time its not exclusive we want to stop a war

Unity as one stand together
Unity evolutions gonna come
