[Intro]

One, two, B 3

You stop the engine in me
I'm working hard I sweat
You stop a fever in me
I want some more of it

When I'm running alone
You fill me up inside
When I got no place to go
You take me for a ride

[Bridge]

(oh no) Better watch your back when you shake it low
(oh no) When you start me up you can stop the flow
(oh no) Never do the same when I get trough
(on no) Cause what I do I do for you

[Chorus]

I like the way, I like the way you move your body
Show me the way, show me the way you shake your
body
I like the way, I like the way you move your body
Show me the way, show me the way you shake your
body
Oh oh oh oh oh move your body
Oh oh oh oh oh shake your body
Oh oh oh oh oh move your body
Oh oh oh oh oh shake your body

Now it's been waitin' too long
Since I felt this before
Can't take my eyes off of you
When you movin' on the floor

Your rhythm's close to my veins
And I just can't deny
That when I'm dancin' with you
I wanna dance all night

[Bridge]

[Chorus]

I like the way your body comes to mine
Show me the way you shake
I like the way your body comes to mine
Show me the way you shake

The way you move your body (move your body, move
your body)
The way you shake your your body (shake your your
body, shake your your body)

[Chorus] (2x)
