"Spaceman"

Visit "[Spaceman](#)" on MotoLyrics.com

"Satalite control, zero minus one hour and fifteen minutes and holding."

"We're now ready for take-off."

"4, 3, 2, 1..."

Dam dam di da di da di, dam di da di da di

Dam dam di da di da di

Dam dam di da di da di, dam di da di da di

Dam dam di da di da di

Spaceman, spaceman, take me away

And let's fly into the Milky Way

Spaceman, spaceman, waiting for you

And let's fly away into the blue

Take me out tonight, under the stars so bright

I wanna see your rocket (see your rocket)

Fly into the space, to a far galactic place

Where you know how to rock it (know how to rock it)

Flying out to the combat zone, fighting all alone

Boy, have I got a treat for you

When you're coming back home

Spaceman, spaceman, take me away

And let's fly into the Milky Way

Spaceman, spaceman, waiting for you

And let's fly away into the blue

Dam dam di da di da di, dam di da di da di

Dam dam di da di da di - You are my Spaceman!

Dam dam di da di da di, dam di da di da di

Dam dam di da di da di

What'cha gonna say, if I ask you, "Can I play

With your ammunition?"

(ammunition)

Fly and fight a war, like you never seen before

It is time for ignition (time for ignition)

Flying out to the combat zone, fighting all alone

Boy, have I got a treat for you
When you're coming back home

Spaceman, spaceman, take me away
And let's fly into the Milky Way
Spaceman, spaceman, waiting for you
And let's fly away into the blue

Dam dam di da di da di, dam di da di da di
Dam dam di da di da di - You are my spaceman!
Dam dam di da di da di, dam di da di da di
Dam dam di da di da di - You are my spaceman!

Spaceman, spaceman, take me away
And let's fly into the Milky Way
Spaceman, spaceman, waiting for you
And let's fly away into the blue

Spaceman, spaceman, take me away
And let's fly into the Milky Way
Spaceman, spaceman, waiting for you
And let's fly away into the blue
