You say you're happy and it's true  
I know you, you're telling lies  
You can't hide it in your eyes  
I know you, you know me

I used to think you knew your mind  
You're that kind, so let it show  
Open up and let it flow  
I know you, you know me

CHORUS:

What's the use of crying  
When there's no denying  
Something's changing your life  
Something's changing mine

You got something in your heart  
Torn apart, you gotta say  
Let us see the light today  
I know you, you know me
