### "Planets"

Visit "[Planets](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Getting high on stardust, swirling in god's jar  
While we're going zig zag between the shooting stars

We just escaped the black holes and dodged the  
meteors  
But it's still raining asteroids on a collision course

We're planets in orbit, we're spinning side by side  
We're shiny, we're starlit, until our worlds collide  
We're planets in orbit, we're spinning 'round and  
'round  
Enjoying the ride, 'til we fall down

Our private solar system spins 'round an ageing sun  
We're floating in too deep space, into oblivion  
Into oblivion

We're planets in orbit, we're spinning side by side  
We're shiny, we're starlit, until our worlds collide  
We're planets in orbit, we're spinning 'round and  
'round  
Enjoying the ride, 'til we fall down

We're suffering from amnesia my friends  
We've forgotten the bad times and now we pretend  
This won't end, this won't end

We're planets in orbit, we're spinning side by side  
We're shiny, we're starlit, until our worlds collide  
We're planets in orbit, we're spinning 'round and  
'round  
Enjoying the ride, 'til we fall down
