Our whole universe was in a hot dense state  
Then nearly fourteen billion years ago expansion  
started

Wait!

The earth began to cool  
The autotrophs began to drool  
Neanderthals developed tools  
We built a wall  
We built the pyramids  
Math, science, history  
Unraveling the mystery  
That all started with the Big Bang  
Bang!

Since the dawn of man is really not that long  
As every galaxy was formed in less time than it takes to  
sing this song  
A fraction of a second and the elements were made  
The bipeds stood up straight  
The dinosaurs all met their fate  
They tried to leap but they were late  
And they all died  
They froze their @\$3\$ off

The oceans and Pangea  
See ya, wouldn't wanna be ya  
Set in motion by the same Big Bang

It all started with the big... Bang!

It's expanding ever outward, but one day  
It will cause the stars to go the other way  
Collapsing ever inward,  
We won't be here,  
It won't be heard  
Our best and brightest figure that it'll make an even  
bigger Bang

Austrelopithicus would really have been sick of us  
Debating how we're here

They're catching deer  
We're catching viruses

Religion or astronomy  
Encarta, Deuteronomy  
It all started with the Big Bang  
Music and mythology  
Einstein and astrology  
It all started with the big bang  
It all started with the big...  
Bang!
