Oh so long I've looked to me
For the answers for my life
All this time I've held the key
And had control of me
But now You're saying
That You also hold the key
For those plans You made for my life
Plans made just for me

Can I trust You
Will You guide me
And show me how to live this life
Should I give my life for You
And can I trust You with this everyday life
And can I trust You with this everyday life

I can feel You telling me
And if I would just believe
You would take my life and show me
Exactly what You mean
When You say that "You can trust me
And I know what you need
I am more for you than anything
You could ever dream."

Can I trust You
Will You guide me
And show me how to live this life
Should I give my life for You
And can I trust You with this everyday life
Can I trust You
Will You guide me
And show me how to live this life
Can I give my life to You
And can I trust You with this everyday life
And can I trust You with this everyday life
