Tonight the stars are dancing
To the song the angels sing
I hear You whisper on the breeze
And every sound echoes the rhythm
Of your heart as I begin to fade
Into this lovely night, I'm alive

Cause our worlds collide
I'm lost inside
Heaven kisses me tonight
Your heart with mine
It beats in time
Now I know why I'm alive

Now that I've found You
I could never let You go away
You left my life never the same
Sing over me and let me hear
The words You wrote for me
Whisper the words
That set my spirit free, sing to me

Cause our worlds collide
I'm lost inside
Heaven kisses me tonight
Your heart with mine
It beats in time
Now I know why I'm alive

Cause our worlds collide
I'm lost inside
Heaven kisses me tonight
Your heart with mine
It beats in time
Now I know why I'm alive
