Our lips met

But I never kissed her

We made love

But I never touched her

Our hearts burned

With an icy fire

We fell down

Higher and higher

Our lips met

(You never know how long you've got)

But I never kissed her

(You'll hope it's working when it's not)

We made love

(The carnal drive for sex remains)

But I never touched her

(Pumping madness through the veins)

No I never touched her

Yeah
