Who Needs To Dream

You were in my dreams
always in my dreams
that was long before I ever saw you standing there
when I felt afraid
of the choice I made
I would close my eyes and hope my dreams
would comfort me but now I'm free

Who needs to dream when there is you
who needs a heaven to look forward to
for my whole life through
Who needs to dream
you're my dream come true
in my fantasy you believed in me
and as long as we're there
then I believed in me, now suddenly

Who needs to dream when there is you
Who needs a heaven to look forward to
for my whole life through
Who needs to dream
you're my dream come true

Now you are my dream
you are my only dream
I'll hold you in my heart forever
who needs to dream
who needs to dream
when I see you there
then I see my every dream
come true

Who needs to dream when there is you
who needs a heaven for my whole life through
who needs to dream
you're my dream come true
every dream come true
