Burning rage, stream of hate, countless bodies burst  
Savage attack, choking on flak, mushroom cloud of  
death  
Nuclear power, radio-active sky, H-bomb splits the  
night

Nuclear - Devastation - Inferno - March into hell

Total death, from the sky, burying all  
Human life, agony, waste of fucking lives

Endless pain reigns in this pit of doom  
Endless fights to conquer the battle storm

Saviour, straight from hell, eagle's wings in flames  
Drop your load, world explodes, madness without end  
Nothing remains, earth corrodes, atomic terror reigns

Iron force of bombers' thunder roar  
Exploding diabolic warhead power  
Nuclear beast of Armageddon  
Phallus of total destruction

Endless pain reigns in this pit of doom  
Endless fights to conquer the battle storm
