The government controls all our lives
When they pump us full of lies
Large corporations are all the same
What do they think - we have no brains?

Governments will try
To make sure we have no private lives
Governments will try
To make us believe their goddamned lies

What they want is a war
Down in El Salvador
They try to make fools of us
But we won't fall for that again

[Chorus]

I just want the companies
To make a lot of big money
Since the companies don't really care
While we're getting killed down there

[Chorus]

What is with the president
And all the other congressmen
I hope that they can see the bodies fall
For no real cause at all

Governments will try to fuck you!!!
I tried to warn you
Governments will try to fuck you!!!
I tried telling you
Governments will try to fuck you!!!
I'm not kidding you
Governments will try to fuck you up!
