

## **Battery** **"Overcome"**

Visit "[Overcome](#)" on MotoLyrics.com

Fighting for ideals not for personal gain  
One man one vote is all they want so why should we  
obtain  
From helping them free themselves we fought for it in  
this hand  
End apartheid, free it's victims, their fate is in our  
hands  
The walls will fall  
Believes become reality

We take our freedom for granted  
While others must fight for their own  
How long must they suffer, we can't let them fight it  
alone  
Indifference isn't solving anything, it's time to take a  
side  
Each day, hammering away at the pillars of apartheid

How long does it have to be before you will see  
This problem won't go away unless we fight for equality
