She came out with her best friend  
For the summer in L. A.  
They took a spot and plopped down on the beach  
Well, you find them there every day

And I said, California guys all can't peel their eyes  
From that girl from New York City  
And L.A. boys, all heard the noise  
About that girl from New York City

We'll turn 'em on with all the things  
That will be happening night and day  
We'll show them such a groovy time  
That they'll both be decidin' to stay

And let me say, the California guys all can't peel their  
eyes  
From that girl from New York City  
The L.A. boys, all heard the noise  
About that girl from New York City

California guys all can't peel their eyes  
From that girl from New York City  
The L.A. boys, all heard the noise  
About that girl from New York City

California guys all can't peel their eyes  
From that girl from New York City  
The L.A. boys, all heard the noise  
About that girl from New York City
