"Say Good Night"

Say good-night
Under the moon
Hushaby
To all the human race

Say good-night
Closing windowpanes
Lonely night
The time to go stargaze

I remember how you smile on my photograph
I've imagined we were high above satellites

Latch onto the moment
In my eyes untill the summer goes
Touch me for a moment
There's no time untill my eyes are closed

Who can rewind?
Who can rewrite?
My road

Venus semms like on the fire in the sky
Tender callings from the firefly
Hushaby

Latch onto the moment
In my eyes untill the summer goes
Touch me for a moment
There's no time untill my eyes are closed
Who can rewind?
Who can rewrite?
My road

Say good-night Tonight's the harvest moon...
