You just can't smile it away
It's much more than passion
No, it's love
And I've heard some people say
They've seen love move mountains

You just can't laugh it away
It's too deep inside
No, it's love
Not just some game you can play
For a laugh and go on your way

Let's sit and talk it over
And work it out
I love you so
And can't we just talk it over
And see what we can do

You just can't pass it away
Like some silly fashion
No, it's love
And love comes eager to stay
It just won't leave you that way

Let's sit and talk it over
And work it out
I love you so
And can't we just talk it over
And see what we can do

You just can't pass it away
Like some silly fashion
No, it's love
And I've heard some people say
They've seen love move mountains

No, it's love
And I've heard many people say
They've seen love move mountains
