Lady I will trap the stars
Mischeated passed on so far
I've been looking for one like you
This love that you took and control don't know what to
do yeah
Lady now I'm begging you
I get down on my knees
This love that you took and control don't know what to
do yeah
You take love and break love trouble has had it with you

I love you
Love me to
I need you

I meet you now the skies have turned grey
Inside you all we have is that day
Lady no one like you
This love that you took and control don't know what to
do
Lady now I'm begging you please
I get down on my knees
This love that you took and control don't know what to
do yeah
You take love and break love trouble has had it with you

I love you
Love me too
I need you
