Birdie, told me, I must get over you, somehow  
And she told me, never to think of you, right now

But it's hopeless to say how can I forget the way, she  
used to love me  
I think about her in my time, know in my mind, it's over

Looks like falling, Heaven is calling my name to me  
Funny faces loving the traces, left for me

But it's hopeless to say, how can I forget the way, she  
used to love me  
I think about her in my time, know in my mind, it's over

Birdie told me, I must get over you, somehow  
And she told me, never to think of you, right now

But it's hopeless to say, how can I forget the way, she  
used to love me  
I think about her in my time, know in my mind, it's over

Birdie taught me, how to get over you
