"Bodyguard"

Visit "[Bodyguard](#)" on MotoLyrics.com

It hurts me when you cry
When you feel the love is gone
Don't give up on us when you got so much to believe in
So I beg you please stay yeah

Danger in the night
Flame that never dies
In a world of lonely faces you need someone to survive
Love like yours should never live alone

Let me be your bodyguard, I can be useful to you
We can just get excited, stop before we go too far
Let me be your bodyguard, living in my protection
We can just get ignited, lost inside
It's only you and me

There's things you shouldn't do
You lose your self-control
Should the eyes of a perfect stranger take you down to
a new sensation
Just turn back to me

Don't wait till it's gone
Don't go where you don't belong
In a world of pain and sorrow, every wish is your
command
A heart like yours should always find a home

I know the signs and I'm telling you
You're living on borrowed time
But a heart needs love like a flower needs rain
Like I'm making you mine

Let me be your bodyguard, I can be useful to you
We can just get excited, stop before we go too far
Let me be your bodyguard, living in my protection
We can just get ignited

What we had never known all our lives
I pray it's not too late
I would die by your side my love
I'm the life that you save

In this world of pain and sorrow, every wish is your
command
A heart like yours should never live alone, yeah

I used to dream of a special one
And now I feel it's coming true
But I couldn't let go, I'm a jealous guy
What you're putting me through

Let me be your bodyguard, I can be useful to you
We can just get excited, stop before we go too far
Let me be your bodyguard, living in my protection
We can just get ignited, stop before we go too far

Stop before we go too far, my love, my life
Stop before we go too far

Let me be your bodyguard, I can be useful to you
We can just get excited, stop before we go too far
Let me be your bodyguard, living in my protection
We can just get ignited, stop before we go too far

Let me be your bodyguard, I can be useful to you
We can just get excited, stop before we go too far
