"Country Women"

Visit "[Country Women](#)" on MotoLyrics.com

Country women now, what you gonna do with your life
Country women now, why don't you get out of this life
Leave my life alone
The first time I met you I knew you were the devil's
daughter
You came on like a river , doin' all the things you
oughta
You're a self made women ,baby, not a made-to-order
If you had your way , I know you'd make me stay
And that would only bring me down

Country women now, what you gonna do with your life
Country women now, why don't you get out of this life
Leave my life alone

(break)

Country women , country women ,country women
country women, country women , ahh....

Country women now, what you gonna do with your life
Country women now, why don't you get out of this life
Leave my life alone
Leave my life alone

Country women now , country women now, country
women now,
Country women now , country women now, country
women now, (fade)
