"Midsummer Nights"

Visit "[Midsummer Nights](#)" on MotoLyrics.com

Rain comes down on a misty day
Light on the water and she's coming my way
To be fair she's only wearing a smile
Ease all my trouble just by driving me wild
And like the moon don't function without the night
We come together and she's hanging on tight
She makes me tremble like I never before
Bringing me up to keep me begging for more
In every hour to be - let me satisfy your heart
I can take the days in return for the midsummer nights

We know the journey to a better life - better life
And we never to be letting go
You got to learn to be lonely to find what you're living
for

Making love on a midsummer night
I love those midsummer nights

You seen the bad times without a doubt
I know you need me - but you couldn't get out
You build your heaven - it'll never be home
In a place without love - how could you ever have known
There may be one fool falling in love with you
You are the vision that I'm hanging on to

Any world - any dream you can see
Can be yours and mine if we want it to be
Let me lie in your arms
Let me understand your love
I can take the lonely days in return for the midsummer
nights

We know the journey to a better life - better life
And we never to be letting go
You got to learn to be lonely to find what you're living
for

Making love on a midsummer night
I love those midsummer nights

Making love to me only

Running forever - I following you
And I'm not afraid
For every hour to be
Let me satisfy your heart
In return for those midsummer nights

(repeat chorus and fade)
