When do I cry
This breakin' heart
Just hurts me more
When we're apart
And there are two of us
With our secret love

Sleep pretty baby while you
Wait so long
Livin' with a love that's not just
Make believe
Lonely nights, I see your
Candle glow
And in my mind, I trace
Together we can take away
The time and the space

Baby when you got a secret love
Every little touch is not enough
Every little moment we're apart
Is pain to me
Maybe we can find some hideaway
Everybody knows but who can say
Secretly you know I'd follow
Anywhere to make it happen

Anyway you want me I'll be
Standing by
I don't wanna lose the one
I hunger for
Naked eyes, they watch us
Everywhere
Nowhere to run, I cry
Everything to lose and no alibi

Baby when you got a secret love
Nothing you can do but rise above
Secretly you know I'd follow
Anywhere to make it happen

There's no goodbye
This breakin' heart

Just hurts me more
When we're apart
And there are two of us
With our secret love
(Together we will take away the time and the space)

Baby when you got a secret love
Nothing you can do but rise above
Every little moment we're apart
Is pain to me
Maybe we can find some hideaway
Everybody knows but who can say
Secretly you know I'd follow
(follow, follow, follow)
Find my secret love

Baby when you got a secret love
Every little touch is not enough
Every little moment we're apart
Is pain to me
Maybe we can find some hideaway
Everybody knows but who can say
Secretly you know I'd follow
Anywhere to make it happen
