

Before The Fall "Swallow The Star"

Visit "[Swallow The Star](#)" on MotoLyrics.com

Try to try what I did
Try to see my eyelids close
Try to break the silence
Try to tag behind us

My mind is wondering
And wondering of you
I tried to forget the
Things that we used to
(But now I) I just seem lost

And I've been walking
Around in circles
And I can't find my way

(Swallow the star)
And see just how far we've come
To Bring it back
To bring us back around

(Swallow the star)
And see just how far we've come
To Bring it back
To bring us back around

Try to picture your face
Try to put on hold they're wealth
Try to not disguise it
Try to recognize
They shattered their dreams
(and they don't know me)

My mind is wondering
And wondering of you
I tried to forget the
Things that we used to
(But now I) I just seem lost

And I've been walking
Around in circles
And I can't find my way

(Swallow the star)
And see just how far we've come
To Bring it back
To bring us back around

(Swallow the star)
And see just how far we've come
To Bring it back
To bring us back around

(Yeah can you feel it
Oh I can see it
Yeah can you see it
Will you sing it with me
Yeah do you feel it
Well I can't do this
I don't want to be so wrong)

And I've been walking
Around in circles
And I can't find my way

(Swallow the star)
And see just how far we've come
To Bring it back
To bring us back around

(Swallow the star)
And see just how far we've come
To Bring it back
To bring us back around

(Swallow the star)
(Swallow the star)
(Swallow the star)
And see just how far we've...
(Swallow)
