I reborn everyday  
But still I can't forget you  
Everyone leads me astray  
Everyday I stay true to myself  
What are we all fighting for  
When in the end we all lose  
Once again my heart breaks  
Cause everything stays the same  
And all the struggle was in vain  
Once again my heart breaks  
Cause everything stays the same  
And all the struggle was in vain  
I've felt  
Like there's only pain  
In this life  
But then you came along  
I've felt  
Like there's only pain  
In this life  
But then you came along  
I fell like  
Like there's something more  
In this world  
In this world  
I fell like  
Like there's something more  
In this world  
In this world  
So the worst isn't over  
There are still wars to fight  
How can I get closer  
Carrying this broken heart  
The world is coming to an end  
All the fables start to bend  
The world is coming to an end  
And never again we be able to defend
