Me and you got a life we're chasing
Gotta run, gotta hide to save it
Keep it quiet in the silence, make it out alive
Let's run away in your light together
What we give just to live forever
Anything if we ever make it out alive

We don't have to say a word
We don't have to fool this world
Go until there's nothing left
There's nothing left
There's nothing left
There's nothing left

You are the only thing
That's close to me
So quietly we'll make it on our own
You are my everything
The air I breathe
And I won't let them make me let you go
So lead me down this road

What we got is a life worth living
Even if it's light we're missing
In the hope there's a vision, make it out alive

We don't have to say a word
We don't have to fool this world
Go until there's nothing left
There's nothing left
There's nothing left
There's nothing left

You are the only thing
That's close to me
So quietly we'll make it on our own
You are my everything
The air I breathe
And I won't let them make me let you go
So lead me down this road

So lead me down this road

Time and time and time again
We'll take the night and we'll light this flame
I'll find the time to see your face
Some way, some way, some way, some way

Time and time and time again
We'll take the night and we'll light this flame
I'll find the time to see your face
Some way, some way, some way, some way

You are the only thing
That's close to me
So quietly we'll make it on our own
You are my everything
The air I breathe
And I won't let them make me let you go
So lead me down this road

So lead me down this road

So lead me down this road.
