I'm not afraid of them
They can't control me now
Becoming who I am is standing for who you are

[Chorus]
When things are falling apart
I won't abandon you
No one is coming to save us now
The world is falling and I'm surrounded [x2]

I've watched you slip away
Don't say you haven't changed
You know I've known you from the start

I've seen the worst in you
I see you leading them astray

[Chorus]

I'm not afraid of them
They can't control me now

You can't control me [x2]
