

Before Their Eyes **"The Things We Stood Against"**

Suddenly everything I stood against
Is now everything I can't live without

Onto my knees I fall faster and faster
I shut you out of my life for so many years
It feels like there is nothing left

Here I am in the exact same place
I said I'd never be again
I shut you out, but now I need you most
Only you can save us now

You'll never give up
You're so thirsty for more
No matter how hard I try,
You're there until the end of time

You're the only one who can save us
You're the only one who can save us now
