Where are you tonight  
I couldn't say goodbye  
Your words still echo in my mind  
The stars fall down lighting up the sky  
If I had one more chance I would have done it right

The sky falls down at your command  
The city will roar with the sound of terror  
And our world will crumble  
At the sound of your voice  
So take my words, it's not my choice

There's no looking back  
Live for right now  
I'm so far away (so far away from you)

With no difference between right or wrong  
We're so far away (so far away)

The sky falls down  
With a single glance  
From your eyes,  
We walk as strangers in these times  
All of what we know is about to end  
We'll keep on fighting, but we'll never win

There's no looking back  
Live for right now  
I'm so far away (so far away from you)

With no difference between right or wrong  
We're so far away (so far away)

Goodbye,  
Goodbye

So far away (so far away)

There's no looking back  
Live for right now  
I'm so far away (so far away from you)

With no difference between right or wrong  
We're so far away (so far away)

Goodbye.
