"For God & The Nation"

Visit "[For God & The Nation](#)" on MotoLyrics.com

Under the flag of honor
Marching towards the front
For God and the nation
Facing the battle storm

Young men join the colors
Heroic deeds in mind
The idea to kill the enemy
Drives them really mad

For God and the Nation
Win the day
Don't surrender till the battle is won
But they're falling one by one

Roaring guns and aircraft
Destruction still remains
Horrors of trench warfare
Shattering their brains

Stumbling over corpses
How long will you survive?
You came to fight for glory
Now you're left to die

For God and the Nation
Win the day
Don't surrender till the battle is won
But they're falling one by one
