"Night Train"

Hey, baby, come with me
Here we go, another ride
Oh, it feels so sublime
The steam and fire engulf me
like a rising tide
This perpetual motion
Pumping, driving locomotion

Nigh train
Very, very slow, it goes where it has to gp
Steady on the tracks, it makes up for
the speed it lacks

Big, metal monster, please
We'll work and sweat, you'll get us there
Night train, lead me on
Through woods and lowlands, safe
within your care
(Journeys ends when lover's meet
Stop the engine trust your feet)
I caress the machine
And we'll stayed locked inside our dream

Night train
It takes more than a hero
It takes a pilgrim soul

Night train
(When it ends it will begin
Like a snake that can't shed it skin
