[Black Sabbath cover]

Have you ever thought about your soul?  
And can it be saved?  
Perhaps you think that when you're dead  
You just stay in your grave  
Must someone be right, and the other be wrong?  
It's just a point of view  
If we can't unite then our people will die  
You know that it's true

Some of us believe in a god or gods  
Or no god at all  
Whatever you believe, we've got to unite  
Until our enemies fall  
There's no way to prove that what I believe  
Is the only way  
Religious belief is a personal thing  
We should keep it that way

[BREAK:]

We spend so much time at war with each other

While our enemies laugh and sharpen their claws  
They see the truth that our Folk have forgotten -  
That Self-Preservation is the Highest Law  
Why can't our folk see beyond their religions and  
Work side by side for the good of us all  
It's insane to argue and bicker and battle  
While we watch our future crumble and fall

Wait until you see what's in front of your  
Face when you open your eyes  
The answers been clear for so many years  
It's still a surprise  
The centuries pass, but religions won't last  
The damage is done  
We haven't got time to recondition our minds  
'Til this battle is won
