One more candle for the evening
One last touch before I fade
Isn't now the ever after?
Love can come at any age

The more we live
The less we die
The more we live
The less we die
It may get funny
So long as you're asking why
The more we live...

Could it be my star is in your gaze?
Could I play these strings to heal your pain?
You were up already, lightning struck you down
Get up one more time and you'll be the man for me

The more we live
The less we die
It may get funny
So long as you're asking why
The more we live...
